Nature Crafts

Pressed Flower Bookmarks

with the
CT State Museum of Natural History

August 4 at 5pm

We welcome the CT State Museum of Natural History to teach us how to make special bookmarks decorated entirely from plants (including some that grow here on library property!) We'll use ink and dyes from berries and other sources, and press flowers to create a beautiful and lasting work of art!

This program runs for **2 hours** and is open to all ages.

There will be age-appropriate options for children, teens, and adults.
